

MF9000

The MF9000 system is a state of the art dedicated 'In-Line', system for simple print to mail processing of medium to high volume applications.

Features include an automatic sealing roller cleaning mechanism, which helps prevent the build up of printer toner on the rollers, and a divert system in the event of a work jam in the sealer.

The system also has a built in double detect system which automatically diverts double fed or incorrect orientated forms.

An optional secure cover is available to help with secure in-line processing.

All common fold types are catered for including double fold (Not compatible with 14" Z-Fold)

The MF9000 is compatible with the following printers (sold separately);

HP LJ 9000dn floor Standing 3000 sheet model
HP LJ 9050dn floor standing 3000 sheet model
HP LJ 9500 hdn floor standing 3000 sheet model
(Colour Laser)
